Bringing the Water of Life to La Gonâve, Haiti

"Plant a Seed ~ Grow a Village"

Summer Newsletter

July 2009

Benis and Don Carter, a two man team, made strides as if they were a team of twenty. Their mission was successful. More souls were added to the kingdom. One baptized in the ocean. The two man team visited the island's only hospital. They spent time with nurses and doctors to see how they could assist them with medication and hospital equipment. The container filled with items for the village was delivered and over six hundred people were blessed with clothes, shoes, household items and a concrete mixer. They worked continued on the dept and more than one hundred people were fed. The villagers continue to work on the road to make accessible the vehicles to drill a well in the future.

History is being made in our lifetime! We are most humbled to announce Mapou Village will have a school! The first ever school is scheduled to open in September for up to 500 children. The classes will start under the trees and in the unfinished building until its completion. It is the Lord's will that the children have the opportunity to read, write, and learn in the knowledge of Christ.

We thank our supporters who continue to lift us up in prayers and financially support us. We know the Lord is doing a wonderful work in us and the people we are serving. The glory belongs to our God only!

Benis & Dominique Guerrier
